<h3 style= "text-align: center;" ><i>Who Is She?</i>&#9997; </h3>
<p style="word-wrap:break-word;margin-bottom:15px;">
Hi! I'm Oshmeade Williams, a student who studies cybersecurity at the University of Technology, Jamaica. I am a kind-hearted individual,
who is passionate about protecting people, both physically and throughout the virtual space. I also aspire to become an entreprenueur so that I can work for
myself one day. This interest of mine(the urge to be independent and protect others) is what led me towards this particular field of study.
</p>

<p style="word-wrap:break-word;margin-bottom:15px;">
My hobbies are baking and farming but I also enjoy hanging out with friends and family- I refer to it as "having the time of my life". Baking allows me
to express my creativity, and also helps with time management. I mean you never entirely know what your cakes and pasteries will truely be like after baking a

Farming teaches me consistency and dedication. Taking care of crops and livestock requires alot for them to strive.
My family and friends are just for moral support. School can be challenging/stressful at times so i'd like to thank them for that.

</p>
```

per Text Markup Language file | length: 7,478 | lines: 118 | Ln: 16 | Col: 72 | Pos: 554 | Windows (CR LF) | UTF-8

```
<p style="word-wrap: break-word;">
At school, I tend to stay to myself, limiting my interaction with unfamiliar people and avoiding large gatherings. I prefer to focus on my goals and ambition,
as being too friendly in the past had taught me the importance of making wise decisions about the people I associate with and the influence that they
have on my life decisions. It taught me to become more independent and mindful of friends. I have learnt to prioritize my education in
order to achieve my long term goals. Achieving my academic goals requires more than just independence, it requires networking.
Therefore, I am slowly appreciating interacting with others who is willing and able expand my knowledge in certain areas.
</p>

<div style= "width:750px;">

<h3 style = "text-align: center;" ><i>Who Is Her Role Model?</i>&#9997; </h3>
<p style="width: 750px;">
Chinsea Linda Lee! Chinsea Linda Lee is a famous Jamaican dancehall artist, known as Shenseea. Although our career paths are totally different,
I look up to her knowing that someone who has lived a similar childhood as mine has became extremely successful. I therefore see myself smaller version through her
</p>
<p>
Shenseea's childhood
house was a little board house with her mom raising chickens in a small coop in the backyard. In video posts she occasionally make online,
she reflects on times when she would ususlly eat cocoa straight from the pod on a tree in her backyard then processing it to make chocolate- all whilst running arc
bare-footed. She even grew up in  a christian home and had to attend church every Sunday. Can you imagine? She couldn't even listen to dancehall music.
All the things I experienced growing up.
</p>

<p>
In an <a href= "https://youtu.be/MNUSv3ZuVYE?si=0mmwVw-mexhF2CNx">interview with Yendi Phillips</a>, a popular youtuber, She reflected on the  year 2015. Thats
when her career journey came in effect, just a month after having her newborn child. She had rough time during that period. Her workplace would leave employees
to find their way home after doing late night shifts. Now remember, shenseea lived in the "ghetto"-as she calls it, at that time. These situations
were unsettling to her so she decided to take a different job offer. Her new job is where her boss noticed her talent and promoted her. Every since she has
become exactly was she dreamt ever since she was a kid.
</p>
<p>
What inspires me the most is that she did not let her humble beginning limit her destiny. Her journey to success reminds me daily of the saying
"if yuh want gud, yuh nose affi run". Simply meaning that success is a matter of hard work and dedication towards a specific goal.
</p>

</p>

<div style="width: 100%; max-width:1400px; padding-top: 20px;">

<h3 style= "text-align: center;" ><i> Large Language Models(LLMs) Impact?</i></h3>

<p style="word-wrap: break-word; margin-bottom: 20px;">
"LLMs such as ChatGPT, Claude, and CoPilot must be used as a tool not a crutch." I strongly believe that this statement is true. Individuals tend to rely soley on
intellegence whenever they are tasked, regardless of it level of difficulty that the task portrays. AI limits critical thinking when used excessively but whenever
can help to organize data and break down complex topics. The video below explain means by which AI can be used ethically.
</p>
<p style= "text-align: center" >
<iframe width="900" height="300" src="https://www.youtube.com/embed/_zHhCd3XL1g?si=c8bwDmSBePfUmVMA" title="Ethical AI Uses" frameborder="0" allow="accelerometer; a
<p/>
<p>
Additionally, LLMs can be used to improve students learning abilty. It can create fun and interactive actitities that are prefered by students, at the pace at whic
are able to learn. This is what I personally do. I ask certain AI models to create quizes, riddles, stories and songs using my pdfs whenever i'm studying
for upcoming exams. This method has worked in my favor. I realize that the information is memorized better this way. I also use it to explain complex maths topics
and to help with the detection of errors in my codes whenever I cant figure it out. I also ensure to further verify my answers, as AI tends to give misinformation
at times.
</p>
<p>
Whenever AI is used in excess, there can be serious consequences. Frequently depending on AI without attempting to complete given tasks on your ownwill lead to
lack of brain development which limits critical thinking, causes laziness and even critical situations like academic dishonesty and expulsion from school.
AI usage does not only affect schools, but also the world of work and other external environment/situations.
<a href= https://bernardmarr.com/what-are-the-negative-impacts-of-artificial-intelligence-ai/> Further readings on the negative impacts of AI
can be found here.

<h1> The Richest Man In Babylon </h1>

<p> What I got from the two chapters "Seven Cures For a Lean Purse" and "The Five Laws Of Gold" is that if a person doesnt work on improving one's self,
all their hard work will eventually go to waste. It is impossible to become successful in the long run if certain measures are not followed. Riches will
slowly deplete, leaving you with nothing. People should learn how to save- with control, limiting their spendings then use it to invest in long term assets
that will be beneficial to them and their families. This will eventually limit their overall liability, decrease spending and eventually leading to
more savings for additional investments and/or wants. It is also important to do background checks, to ensure that the money that you are spending and to
whom, is ethically approved. This is very important. It is better to receive small sums of cash/assets that are "clean" than
to attempt go beyond your means because it will catch up to you and your business negatively one day. As the saying says, "what's in the dark must come to light",
therefore,"honest bread", is extremely important when success is the aim. All businesses must be registered and insured. This ensures that in case of any event of a
unfortunate situation, it is much easier to get back on track.
</p>

<h2> How I Can Align What I Learnt</h2>

<p>
I will think about my actions and how these decision will impact me financially in the near future then make wise decisions and act accordingly. Two ways in which I
<ul>
<li>Prior to reading those chapters, I planned on getting my bachelors and stop at that, thinking that i'll be making enough money from a cybersecurity job.
Now I want to expand my learning further in order have better opportunities in the world of work. </li>
<li>Expanding my mindset from only focusing on cybersecurity(this is what im currenntly studying) to exploring other paths as well, such as farming. I have a
piece of land which is currently not being used efficiently so will limit the amount of money that i'd spend during school hours, do some reasearch for the
farming industry then use the money that I had save to buy some seeds and a few chickens.
</ul>
These two things will eventually increase my income.
